

Driving Industrial Evolution

Company Profile

Committed to advancing industrial technology with innovative, efficient and reliable solutions.

Founded in 1919 in Osaka, Japan, Torishima is a specialist pump manufacturer and industrial service provider

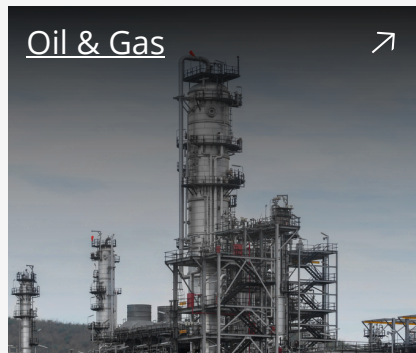

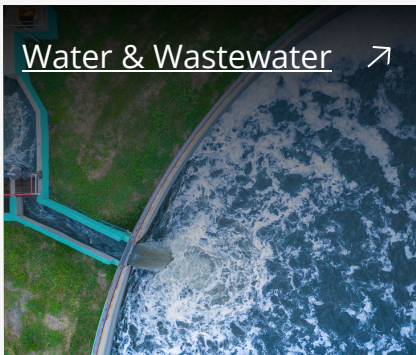

Our passion for the products and services we offer drives us to keep innovation at the heart of our business and to remain a leading company in the industry, evolving every day and aspiring to be indispensable to society.

About Us

Established in Europe for more than two decades, we have a highly skilled team and a long history in the industry, ready to deliver exceptional services that drive the success of our business partners.

Our mission is to listen to our customers, understand their needs and meet their expectations. Therefore, we focus on maintaining a continuous investment in **research and development** to offer a **technology based on efficiency, safety and reliability** applied to our customers' projects and linked to our commitment to the **environment, in different industries.**

More than 100 years of experience and innovation

Since 1919

Torishima was founded in Osaka City, as a water pump and mill factory.

1955

Received an order for ultra-large pumps for a drainage pumping station, the largest of its kind in the East

1978 - 2002

Torishima began its global expansion in 1985, and in 2002, the launch of the **Torishima Global Team for full-scale overseas growth.**

At that point, the **Service Solutions** division began expanding globally, strengthening its role within the Group.

2010

In 2010, Torishima opened its first workshop in Europe, in the UK (Glasgow). We currently have offices in the UK, Spain, France and sales agents in Norway and Ukraine.

This allows us to both continue to work hand in hand with our manufacturing team to follow the whole process to meet our customers' needs and to provide the best services.

1927

Agricultural-use pumps won first prize in Japan.

1949

Pioneers in the systematic research of mechanical seals.

1975

Increased pump orders for seawater desalination plants in the Middle East.

Now

Torishima Supplied pumps to nearly all of the world's top 20 largest seawater desalination plants

2009

Initiated the „Go Green with Pumps” to promote energy efficiency of pumps. Received the Energy Conservation Grand Prize in 2014

Sustainability

At Torishima we develop products and technologies aimed at decarbonised, green and sustainable solutions with the goal of being an "indispensable company for society".

By prioritising sustainability, we aim not only to protect our planet for future generations, but also to lead innovation towards a cleaner and more responsible future.

Our Network

Offices in more than 25 countries
17 service centres

Innovative systems solutions
coupled with expertise in pump
technology.

Maximise efficiency, reduce maintenance costs and conserve energy in all applications through innovative products and solutions.
