

Torishima Service Solutions

Capability Document - **Europe**

Engineered Solutions Provider

Our main objective is to provide comprehensive solutions that benefit our customers in multiple aspects:

Optimising Efficiency

We work to improve our customers' operational efficiency, ensuring optimal performance of their assets.

Reducing Energy Consumption

We develop solutions that minimise energy consumption, contributing to a more sustainable and economical operation.

CO2 Reduction

We are committed to reducing our carbon footprint through advanced technologies and responsible practices.

Mean Time Between Failure

We develop equipment that meets specific process requirements, improving reliability and extending system life.

Mechanical Services

From our dedicated facility in Glasgow, Torishima Service Solutions mechanical services are available to carry out any in situ repairs, as well as inspections, overhauls and installations on a host of equipment, both rotating and static, across various industries.

Our engineering staff are specially trained to handle repairs and overhauls of pumps, motors, compressors, gearboxes, steam/hydro turbines, heat exchangers, fans, mechanical seals and valves.

Coatings

As a leading provider of integrated surface preparation and coating services, our experience allows us to precisely define a customised solution that best suits the customer's needs in different industries.

Based on our expertise in surface engineering and Advanced Polymer Technology, we can extend the life of equipment by effectively combating abrasion, erosion, corrosion and chemical attack.

Pump Spares

The Torishima Spare Parts Division serves as the central hub for the supply of OEM Torishima Spare Parts, Replacement Pump Units, and all related equipment for Torishima installations throughout Europe, Africa and Latin America.

Our spare parts service is tailored to meet our customers' exacting standards of quality and certification. Designed to enhance our comprehensive service capabilities, ensuring we can restore our customers' equipment to a like-new condition while maintaining maximum performance and reliability.

Pump Testing

Assess the performance and efficiency of pumps used in various industries.

We use the test loop to demonstrate efficiencies of renewed or improved performance when overhauling or upgrading pumps to meet more challenging operating demands at site. Whether to increase pump performance or to reduce CO2 emissions and operating costs.

With over 100 years of experience as a pump manufacturer and service provider, we have the expertise to accurately perform the tests and provide practical information for pump optimisation and maintenance.

Cooling Water Systems

We understand that effective cooling is essential for industrial equipment to operate efficiently.

Our Cooling Water Systems are designed to remove excess heat from vital components, including pump bearings, lube oil systems, chillers, electric motors, VSD transformers, and fan filter units. By ensuring optimal operating temperatures, our systems enhance performance and extend equipment lifespan.

Fluid Power

Our engineering capabilities cover consulting, project management, design, manufacturing, and commissioning of complex hydraulic and control systems, including:

- Hydraulic Power Units (HPUs)
- Flushing & Testing Rigs
- Control Panels
- Lubrication Systems

Part of the Torishima Group

Cryo Pump Repairs

CPR Ltd is a wholly owned subsidiary of Torishima with over 30 years' experience in the inspection, maintenance, installation and commissioning of submersed motor, cryogenic pumps, for the liquefied gas industry.

- **Workshop services: Grangemouth Facility**
- **Field Service**
- **Spare Parts**

ICI Caldaie

ICI Caldaie are one of the largest manufacturers of boilers in Europe - their UK operation is part of the Torishima Group.

Their comprehensive range of commercial boiler products covers low temperature condensing boilers and low temperature high efficiency hot water boilers.

KRG

KRG Specialist Engineering is a wholly owned subsidiary of Torishima, with over 45 years' experience delivering high-precision machining, complex assembly, surface treatment, and refurbishment solutions to the defence, energy, and industrial sectors.

Committed to advancing industrial technology
with innovative, efficient and reliable solutions

Founded in 1919 in Osaka, Japan, Torishima is a specialist pump manufacturer and industrial service provider.

Our passion for the products and services we offer drives us to keep innovation at the heart of our business and to remain a leading company in the industry, evolving every day and aspiring to be indispensable to society.
